Condition

Atherosclerotic or thrombotic occlusion of the coronary vasculature.

Pseudonyms and other related conditions include:

Angina

Ischaemic heart disease (IHD)

Myocardial infarction (MI)

Heart attack

Guidance at RECRUITMENT for adult volunteer donor (NA for maternal donor (cord blood donation))

UNACCEPTABLE

Guidance at CT/WORK-UP

UNACCEPTABLE, PERMANENT DEFERRAL

Individual at Risk

Donor

Justification

Myocardial infarction and angina have been well-documented as complications of both bone marrow and mobilised stem cell collection. In donors with known coronary artery disease, both processes pose an unacceptable risk to donor.
