Condition

Disease of the vasculature of the brain. This includes:

Stroke, or cerebrovascular accident, whether haemorrhagic or embolic

Transient ischaemic attack

Intracerebral haemorrhage, including subarachnoid, subdural and extradural bleeds

Guidance at RECRUITMENT

UNACCEPTABLE

Guidance at CT/WORK-UP

UNACCEPTABLE, PERMANENT DEFERRAL

Individual at Risk

Donor

Justification for guidance

Both embolic stroke and intracerebral haemorrhage have been reported as adverse events in stem cell donors. In order to reduce this risk, it is prudent to defer any donor with a history of cerebrovascular disease or accident.
