

**DANISH PATIENT
SAFETY AUTHORITY**

Customs Officer

To the custom officer

This transport by Ontime Onboard Courier contains lifesaving hematopoietic stem cells for a patient in urgent medical need in Denmark. Therefore the Danish Patient Safety Authority as Competent Authority for stemcell activities in Denmark endorses the transport to proceed across the Danish border regardless the border otherwise may be closed to persons and/or goods due to the COVID-19 pandemic.

The transport should be allowed to continue unhindered and without delay across the border due to the time constraints of the product and the patient in need, even when coming from a "high risk country" and even when the driver does not carry a negative COVI19 test result (<72 hours).

If you have any questions regarding this transport, please contact the Copenhagen Bone Marrow Transplant Center at the Phone numbers given in the concomitant letter from the Copenhagen Bone Marrow Transplant Center, Rigshospitalet.

Thank you for your cooperation and assistance.

Yours sincerely

Anne Cathrine Bollerup
