

Donor as a Research Subject

The Transplant Center may request that donors are invited to consent to being involved in a research program, project, or study. An application must be submitted to CEDACE by the principal investigator with the following:

- Evidence of relevant institutional review board approval
- A statement detailing how any costs incurred by CEDACE as a result of the donor participating in the study will be reimbursed (additional blood draws, donor travel expenses and loss of earnings)
- The research protocol
- The donor information sheet
- The donor's consent form

All research studies involving CEDACE donors will require the approval of the CEDACE Medical Director and the Medical Advisory Board.
