

Minimal Criteria to Access a Donor from CEDACE Portuguese Donor Registry

The minimal criteria to access a donor listed in the CEDACE Portuguese Donor Registry database are listed here:

- The International Registry acting on behalf of the Transplant Center must participate in the WMDA.
- The Transplant Center must be eligible or accredited with the appropriate national bodies and registered with the appropriate national and International transplant outcome organizations, such as the European Group for Blood and Marrow Transplantation (EBMT) or the Center for International Blood and Marrow Transplant Research (CIBMTR).
- The Transplant Center must be active in allogeneic HSC transplantation and must have performed for the last 2 years and plan to perform a minimum of 10 new allogeneic HSC transplants per year.
- The Transplant Center must obtain informed consent of the patient for the transplantation, according to the national and International laws and regulations such as the WMDA standards.
- The Transplant Center must obtain informed consent of the patient for sharing personal and medical data with CEDACE according to national and International laws and regulations such as General Data Protection Regulation.
- The Transplant Center must inform the patient that the donor has the right to withdraw at any time or can be determined to be unsuitable to donate stem cells by the Donor Center or the Collection Center.
- Transplant indications for which a donor can be requested for a specific patient are accepted if indicated as standard of care or Clinical option by appropriate bodies such as the EBMT.
- When a donor is requested for a patient who is treated according to a procedure where a transplant is generally not recommended or that is considered experimental, the request must be reviewed and approved by the CEDACE Advisory Medical Board. In this case, a full informed consent from the donor is required.
