

Validation analysis reports of test XML files

We have validated all test XML files received through the data exchange platform during the proof of concept period.

All organisations who sent their test files, should have received an analysis report as well as an error report. If you have previously sent a file, but haven't received the analysis report, please contact us through support@bmdw.org.

Please be aware that we only validated your XML files against the XSD schema files with some additional manual check. The specific BMDW business rules cannot be validated yet and it is possible that records that were accepted now, will be rejected later due to these additional validation rules. As soon as we can also validate the BMDW business rules, we will test files again.

Currently, we are working to develop the new (and final) upload platform. We anticipate using the new upload platform in the next two weeks. You will be informed with instructions and new credentials as soon as you can upload the updated test XML files following on from the error reports provided by us.

Thank you for your patience and we will notify you about any updates as soon as possible.
