

# Maintenance & New release BMDW Search & Match Service

Today, we will perform a new release of our Search & Match Service and the Matching service OptiMatch.

The developers will start around 11:00 CET and it will take about 1 Hr.

During this update, you cannot access the BMDW Search & Match Service and the page will be in maintenance mode.

We are sorry for not notifying you earlier and the inconvenience this might cause for your daily work, but we will release some nice new features. We will inform you as soon as possible once the Search & Match Service is available again.
