## Condition

### Basic information

Chronic optic nerve damage, characteristically associated with unstable or a sustained increase in the intraocular pressure

### Types

(Primary) open-angled glaucoma

(Primary) angle-closure glaucoma

Secondary glaucoma:

Drug-induced (corticosteroids)

Neovascular (diabetic retinopathy)

Inflammatory (iritis)

Traumatic / postsurgical

Developmental glaucoma

## Individual at risk

Donor

## Guidance at RECRUITMENT

Eligible if stable and well-controlled

Ineligible if progressive loss of vision or tendency to acute glaucoma attacks / angle-closure crisis

## Guidance at CT / WORK-UP

Eligible if stable and well-controlled

Ineligible if progressive loss of vision or tendency to acute glaucoma attacks / angle-closure crisis
